### **PRESS RELEASE**

#### OREGON INVASIVE SPECIES COUNCIL SEEKS NOMINATIONS FOR 2012-2013 COUNCIL SEATS BY DECEMBER 15

SALEM, Oregon— The Oregon Invasive Species Council is seeking nominations for five open seats for positions currently filled by members whose terms expire on December 31, 2011.

People with expertise in the following areas are especially encouraged to seek nomination: 1) environmental law, 2) marine and estuary ecology and systems, including shellfish aquaculture, 3) transportation/trade, 4) horticulture/weed research, 5) small woodlands, 6) parks and recreation, 7) science education/K-12, 8) ports and shipping, 9) pet industry, 10) regional coordination, and 11) agriculture industry. State statute requires appointing authorities to appoint persons representative of the geographic, cultural, and economic diversity of this state. Terms are for two years, and there is a two-term limit.

There are 15 seats on the Council. Six of them are permanently assigned to the Oregon Department of Agriculture, Oregon Department of Fish and Wildlife, Oregon State University (Sea Grant), Portland State University (Center for Lakes and Reservoirs), Oregon Department of Forestry, and Oregon Department of Environmental Quality. The six permanent members are responsible for appointing nine at-large members from government agencies, universities, industries, organizations or individuals having an interest in invasive species.

The at-large individuals about to vacate their positions represent USDA Forest Service, USDA-Animal Plant Health Inspection Service, Dow Agrosiences, Wallowa Resources, and SOLV.

Council members are not paid, but they are reimbursed for travel expenses when on Council business, including meetings. Nominees should be willing to commit to three 1.5-day meetings per year in various parts of the state, conference calls, and additional work on behalf of the Council.

Nominations should be sent to OISC Coordinator Lisa DeBruyckere, 6159 Rosemeadow Lane NE, Salem, OR, 97317 or [lisad@createstrat.com](mailto:lisad@createstrat.com). Please include the individual's name, title, phone, fax, e-mail, and mailing address as well as a brief description of their qualifications. In addition, the Council requests a statement from the person being nominated regarding why they are interested in the position. The deadline for nominations is December 15, 2011. Appointments will be announced shortly thereafter.

Formation of the Council by the legislature was a major step in addressing invasive species problems in Oregon. Non-native weeds and undesirable exotic animals threaten vital habitats and jeopardize important commercial species. Ivy, Nutria, European starlings, Dutch elm disease, European green crabs, Himalayan blackberries, and German yellowjackets are all examples of invasive species now established in Oregon. Other species, such as zebra and quagga mussels, Chinese mitten crab, gypsy moth, emerald ash borer, west Nile virus, Asian carp, crayfish and kudzu, threaten to invade.

The Council began work on January 1, 2002. Its purpose is to facilitate communication, education, and cooperation on invasive species problems. Examples of Council activities in the past year include leadership in a tri-state research-based outreach campaign on preventing the spread of pests from non-local firewood, creation of a committee to address newly discovered invasive tunicates in Oregon coastal bays, and development of a draft action plan for the State of Oregon.

Any questions about the nomination process should be directed to OISC Coordinator Lisa DeBruyckere, (503) 704-2884, [lisad@createstrat.com](mailto:lisad@createstrat.com).
