

Aquatic Invasive Species (AIS) Prevention Permit

All operators of motorboats not registered in Oregon are required to purchase and carry an AIS permit.

All Oregon registered motorboat owners pay their AIS fee along with their two year registration, so no separate AIS permit is required.

Out-of-state motorboat owners who do not have an out-of-state AIS permit can be fined \$50.

Waterway Access Permit

Operators of paddle craft 10 feet or longer need a Waterway Access Permit.

Failure to show Water Access Permit to law enforcement can lead to a \$115 fine.

Annual permits are available for purchase through the Oregon Marine Board's website: (<https://odfw.huntfishoregon.com/login>) and at any Oregon business that sells hunting and fishing licenses for the Oregon Department of Fish and Wildlife.

How much do the permits cost?

Waterway Access:

7-day permit: \$5, and \$2 agent fee.
1-year permit \$17, and \$2 agent fee.
2-year permit \$30, and \$2 agent fee.

Out-of-state motorboat AIS Permit:
Cost is \$20, and \$2 agent fee. Good for one calendar year.

Before launching and before leaving...
Inspect everything!

<https://www.oregoninvasivespeciescouncil.org/clean-drain-dry>

Clean all aquatic plants, animals and mud from your boat, motor or trailer and discard in the trash. Rinse, scrub or pressure wash, as appropriate away from storm drains, ditches or waterways. Lawns, gravel pads, or self-serve car washes are best.

Drain your motor, live well, bilge and internal compartments on land before leaving the waterbody.

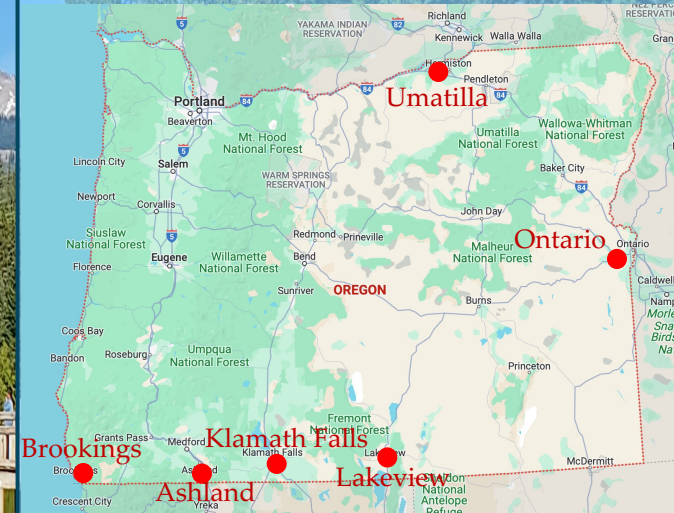

For Paddle Boats, drain by inverting or tilting the craft, opening compartments and removing seats if necessary. Rinse or flush under flooring, at inflation chamber joints or other areas that can trap mud and debris.

Dry your boat between uses if possible. Leave compartments open and sponge out standing water. Find a place that will allow the anchor line to dry.

Inspection Station Locations

**Inspections and Decontamination are free, Hours and days may vary.*

Inspections take approximately 10 minutes.

Map of Oregon, Retrieved 11-06, 2023, [Google Maps](https://www.google.com/maps).

If a boat passes inspection, the driver is given an inspection report. This is proof of compliance and is a receipt of the inspection.

If a boat has any invasive species, the inspection team will decontaminate the craft on-site. This could take anywhere between 20 minutes to 1 hour.

Inspectors will show the boater how to clean, drain, and dry the craft before launching it into Oregon waterways.
